Divisional Health Officer,  
19 St. James Street,  
ACCRINGTON.

To the Chairman and Members of the  
Blackburn Rural District Council

Mr. Chairman, Ladies and Gentlemen,

I beg to present the report on the work of the Health Department  
for the year 1969.

There appear to be no special points during the year which call  
for comment and the general health statistics are very satisfactory.

I wish to thank the Officers and Staff for their co-operation  
throughout the year, and yourself Mr. Chairman and members of the Council  
for your friendly interest and goodwill.

I am,

Your obedient servant,

R.C. WEBSTER

Medical Officer of Health  
Blackburn Rural District Council.

## NATURAL AND SOCIAL CONDITION OF THE AREA

Area in Acres	19,469
Rateable Value (31st March, 1969)	672,469
Estimated Product of ld. Rate	£ 2,658
Population, Census 1961	15,051
Resident Population, mid-1969 (Registrar General's Estimate)	19,520
Death Rate per 1,000 of the Population	14.0
Birth Rate per 1,000 of the Population	14.2

---

The 14 villages in the Rural District of Blackburn are situated in either the fertile valley of the Ribble to the north or in the bleak moorland areas to the south of the district. Most of this area is given over to pasture and meadow-land, with some 360 farms devoted entirely to stock-raising and the production of milk. In addition to agricultural employment there are 10 large factories in the area engaged in cotton weaving, paper making, plastics, glazed earthenware manufacture and light engineering.

In the post-war years, the Council has provided for the development of Housing Estates in parishes where industrial employment is available. Water mains, Sewers and Sewage Works have been extended and improved to serve these Estates and to ensure the most modern amenities for present and future residents of the district. In consequence of this progress the use of land for housing development is increasing, the population of the district has increased nearly 46% in the last 10 years.

### Vital Statistics

Much of the population of the district is made up of retired persons which explains the lower birth rate (14.2 per 1,000 live births) as compared with England and Wales (16.3 per 1,000 live births). The same circumstances reveal a death-rate (14.0 per 1,000 population) in excess of that for England and Wales (11.9 per 1,000 population).

The main causes of death were heart disease - 71, pneumonia - 34, cancer - 31 and vascular disease of the nervous system - 28. There were 9 deaths from cancer of the lung or bronchus.

## SECTION 2. CONSTITUTIONAL AND STATUTE

1. The Constitution of the United States of America is hereby adopted and shall be the supreme law of the land. The several States shall make no laws respecting the rights of the citizen which shall be in conflict with the Constitution of the United States.

2. The Legislature shall have the power to pass laws which shall be in conformity with the Constitution of the United States.

3. The Executive shall have the power to execute the laws of the State.

4. The Judiciary shall have the power to interpret the laws of the State.

5. The people shall have the right to elect their representatives to the Legislature.

6. The people shall have the right to elect their representatives to the Executive.

7. The people shall have the right to elect their representatives to the Judiciary.

8. The people shall have the right to elect their representatives to the Legislature, Executive, and Judiciary.

9. The people shall have the right to elect their representatives to the Legislature, Executive, and Judiciary.

10. The people shall have the right to elect their representatives to the Legislature, Executive, and Judiciary.

## SECTION 3. JUDICIAL POWER

1. The Judicial Power shall be vested in the Supreme Court and in such inferior Courts as the Legislature may from time to time ordain and establish.

2. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

3. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

4. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

5. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

6. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

7. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

8. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

9. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

10. The Supreme Court shall have original and appellate jurisdiction in all cases in which the State is a party.

1. The Legislature shall have the power to pass laws which shall be in conformity with the Constitution of the United States.

2. The Executive shall have the power to execute the laws of the State.

3. The Judiciary shall have the power to interpret the laws of the State.

4. The people shall have the right to elect their representatives to the Legislature.

5. The people shall have the right to elect their representatives to the Executive.

6. The people shall have the right to elect their representatives to the Judiciary.

7. The people shall have the right to elect their representatives to the Legislature, Executive, and Judiciary.

8. The people shall have the right to elect their representatives to the Legislature, Executive, and Judiciary.

9. The people shall have the right to elect their representatives to the Legislature, Executive, and Judiciary.

10. The people shall have the right to elect their representatives to the Legislature, Executive, and Judiciary.

### INFECTIOUS DISEASES

There were 132 cases of infectious diseases (including 1 case of tuberculosis) notified during the year. The largest numbers were of measles 102, scarlet fever 15 and dysentery 10.

The 1 new case of tuberculosis was pulmonary. At the end of December there were 52 cases on the register as compared with 56 for 1968.

### HOUSING

328 houses have been erected by the Council and 2,748 by private enterprise since the end of the war. An examination of the applications for Council Houses reveals that the Housing Programme has caught up with most priority cases.

### WATER SUPPLIES

The Public Health Inspector points out that all 14 parishes have a piped supply of water although one area which is sparsely populated and undulating country has no mains supply (Pickup Bank).

### NATIONAL ASSISTANCE ACT, 1948

No action was taken by the Council under Section 47 of this Act.

### LOCAL HEALTH SERVICES

The Public Health Services provided by the Lancashire County Council are controlled locally by Divisional Health Committees composed of local representatives. Blackburn Rural District lies in Health Division No.5 and the office of the Medical Officer of Health is undertaken together with that of Divisional Medical Officer, who operates both the County Council's Public Health and School Medical Service.

The Nursing Staff includes Health Visitors, School Nurses, Midwives and District Nurses. The provision of clinics for a rural area, with a scattered population, presents special difficulties. A new purpose made clinic has been provided on the Council's housing site at Mellor and another is proposed in the parish of Livesey where intensive housing development is taking place. In addition to the Clinic at Mellor a further four parishes are served by clinics in the area and a clinic at Whalley serves the Billington area. Specialist Clinics are available in adjacent urban areas.

1. The first part of the report deals with the general situation of the country and the results of the survey.

2. The second part of the report deals with the results of the survey in the different districts.

### Conclusion

The results of the survey show that the situation in the country is generally satisfactory, but there are still some problems which need to be solved.

### Recommendations

It is recommended that the government should take measures to improve the situation in the different districts.

### References

1. The first reference is to the report of the survey.

### Appendix

The appendix contains the results of the survey in the different districts.

The appendix also contains the results of the survey in the different districts.

### Ambulance Services

The area is adequately covered by ambulances from Accrington, Darwen and Blackburn.

### Child Welfare Clinics

Clinics at which mothers may attend with thier children from medical examination and for the purchase of infant welfare foods, are held as follows:

Tockholes (Chapel)	Alternate Tuesday afternoons (2.0 p.m.)
Livesey (Cherry Tree Lane)	Monday & Tuesday afternoons (2.0 p.m.)
Mellor (St. Mary's Gardens)	Alternate Wednesday afternoons (2.0 p.m.)
Wilpshire (Methodist School)	Alternate Thursday afternoons (2.0 p.m.)
Clayton-le-Dale (Salesbury Mem. Hall)	Alternate Thursday afternoons (2.0 p.m.)
Whalley (Methodist Church)	Monday afternoons (2.0 p.m.)
Darwen (Civic Health Sentre Union Street)	Monday & Thursday afternoons (2.0 p.m.)
Langho (3, Birtwistle Terr.)	2nd & 4th Wednesday mornings (9.0 a.m.)

### Soecialist Treatment

Facilities are available for Specialist examination and treatment of children suffering from eye defects, diseases of ear, nose and throat, orthopaedic defects, for treatment by artificial sunlight or child guidance. Children are first seen at Child Welfare or Minor Ailment Clinics or at School Medical Inspections and the appropriate arrangements are made.

### Midwives

The Midwives serving the area are as follows:

Mrs. M. Reeves, District Nurses Home, 90, Branch Road, Mellor.	Mellor 2313
Miss J. Butler, 19 Florence Street, Blackburn.	Blackburn 54800
Miss S. Milligan, 64, Devon Road, Intack.	Blackburn 51365

### Home Nursing

The midwives also act as District Nurses and the Parish of Belthorn is served by the Darwen District Nursing Service, Nurses Rooms, Darwen 72547.

### Care of the Aged

There are six homes in the No. 5 Lancashire County Council Health Division which provide residential accommodation for aged persons, two of which are in the Blackburn Rural District, i.e.,

'Glendene', Wilpshire.	accommodation - 21 women.
'Warren Holt', Wilpshire.	accommodation - 26 men and women.

The following table shows the results of the survey conducted in the year 1998.

Table 1: Survey Results

The survey was conducted in the year 1998 and the results are as follows:

Category	Response	Percentage
1. General Information	1.1. Name of the respondent	100%
1.2. Age of the respondent	18-25	25%
1.3. Gender of the respondent	Male	60%
1.4. Education level	High School	30%
1.5. Occupation	Student	40%

The survey was conducted in the year 1998 and the results are as follows:

Table 2: Survey Results

The survey was conducted in the year 1998 and the results are as follows:

Category	Response	Percentage
2. Attitudes	2.1. Attitude towards the environment	70%
2.2. Attitude towards the government	Positive	30%
2.3. Attitude towards the media	Positive	40%
2.4. Attitude towards the economy	Positive	50%
2.5. Attitude towards the culture	Positive	60%

The survey was conducted in the year 1998 and the results are as follows:

Category	Response	Percentage
3. Opinions	3.1. Opinion on the environment	70%
3.2. Opinion on the government	Positive	30%
3.3. Opinion on the media	Positive	40%
3.4. Opinion on the economy	Positive	50%
3.5. Opinion on the culture	Positive	60%

42 Wellington Street, (St. John's),  
BLACKBURN.

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in presenting my Annual Report covering the year  
1969.

The rapid expansion of new private housing estates in the district in the last 10 years and the shortage of labour continues to present problems for the Scavenging Department. During this period there has been a marked change in the standards of hygiene in food premises due no doubt to the fact that more than 50% of houses in the area are of post war construction and environmental conditions in the rural area are so good that there has been a raising of hygiene standards in shops.

I should like to thank the Health Department Staff for their continued assistance and the Health Committee for their continued encouragement and counsel.

Yours faithfully,

G. R. WHITE

Public Health Inspector.

## SANITARY CIRCUMSTANCES OF THE AREA

### Water Supplies

The number of inhabited houses in the area is 6292

6064 (96.4) being supplied by public mains.

228 ( 3.6) served by private spring supplies.

The Fylde Water Board is the statutory water undertaking for the whole of the Rural District. The Board has, since taking over certain local water supplies in the County area, carried out large-scale alterations and extensions to their undertaking so as to improve the quality and quantity of the water supplies.

The only properties in the Rural District which have no public mains supply of water are small localities at Mellor (Woodfold Estate Supply) and Pickup Bank and a number of isolated cottages and farms.

Routine sampling of water from public mains supplies is carried out by the Public Health Inspectors and occasional checks are made of wells supplying private dwellings.

### Drainage and Sewerage

Details of the methods of drainage and sewerage disposal for the various Parishes in the area are as follows:-

Billington Sewage Works - These works were constructed post-war and extended in 1966. The method of treatment adopted is by preliminary sedimentation and sprinkler filtration. The works serve the parish of Billington (including Langho) and part of the parishes of Salesbury (Copster Green Area) and Wilpshire. The outfall sewer passes sewage through a Parkwood Mechanical Screen to detritus tanks and thence to a rotary sedimentation tank with mechanical sludge scrapers. Sludge is withdrawn to cold digestion storage tanks and sludge drying beds. Sewage passes through biological filters to Humus tanks. The works serve a population of 9,000 persons with a dry weather flow of 298,000 gallons per day.

Wilpshire Sewage Works - These works were reconstructed in 1969. The method of treatment is the same as the Billington Works. The works were designed to serve a population of 3,000 persons with a dry weather flow of 105,000 gallons.

Mellor Brook - A Planning Application was made to develop further land at Branch Road, Mellor. A scheme to provide increased pumping capacity and a larger rising main was submitted to the Ministry of Housing and Local Government.

MEMORANDUM

TO : THE BOARD OF TRUSTEES  
FROM : THE PRESIDENT  
SUBJECT: [Illegible]

[Illegible text block]

[Illegible text block]

RECOMMENDATION

[Illegible text block]

[Illegible text block]

[Illegible text block]

[Illegible text block]

[Illegible text block]

Mellor Sewerage - In 1960 the Council abandoned the Mellor Sewage Works and redesigned the sewerage system so that all the sewage from the Parish of Mellor and that part of Balderstone in the area of Mellor Brook is connected to the Blackburn Corporation Trunk Sewer.

Balderstone/Osbaldeston Sewerage - Parts of the two parishes are sewered and sewage is pumped to the parish of Mellor and gravitates to the Blackburn Corporation Trunk Sewer.

Eccleshill - The sewers from the Parish of Eccleshill discharge into the Darwen Corporation Works at Lower Eccleshill.

Tockholes Proposed Sewerage - A scheme of sewerage for the parish of Tockholes and the Pickop Brow area of Livesey was approved and work began in 1969. Sewage will be pumped to the Blackburn Corporation Sewers. The estimated cost is £81,200.

Pleasington Proposed Scheme - Work commenced in 1969 on a scheme to close down the land irrigation treatment works serving dwelling houses at Feniscowles and to pump sewage to the Blackburn Trunk Sewer. Provision is being made to receive trade wastes from the Star and Sun Paper Mills. The estimated cost is £26,770.

Livesey Sewerage - Works commenced on the construction of a Surface Water Sewer to alleviate flooding and to exclude road drainage from the foul sewer.

#### SEWAGE PUMPING STATIONS

The Council have three Pumping Stations at Billington (Wallwin Pumps), Mellor Brook (Wallwin Pumps), and Eccleshill (Adams Hydraulics), together with four Ejector Stations to serve properties in Wilpshire (Adams Ejector), Copster Green (Shone Ejector), Feniscowles (Adams Ejector) and Osbaldeston (Sigmund Pump-Solids Diverter).

#### CAPITAL PROJECTS

Livesey/Pleasington Sewerage Scheme	£26,770
Tockholes Sewerage Scheme	£81,200
Mellor Brook Sewerage - Increased pumping capacity	£10,850
Livesey Surface Water Sewer	£31,150

## PUBLIC CLEANSING SERVICE

### General Comments

Apart from isolated cottages, the whole of the district is scavenged by direct labour and during 1969 it was possible to maintain a regular weekly collection of house refuse.

Workmen are provided with three sets of overalls each year and they are also issued with donkey jackets and waterproofs for inclement weather.

### Refuse Collection

The Council operates Dennis and Shelvoke & Drewry Refuse Vehicles designed especially for municipal work. The number of narrow back streets in the area necessitates vehicles of short wheel base. Two new compression vehicles were purchased in 1968. New housing estates are being developed in the area and in an endeavour to improve output and reduce mileage it will be necessary to consider replacing the remaining 10 cu. yd. side loader by a vehicle of 30/35 cu. yard capacity. This cannot however be implemented until better mechanical plant is available at the refuse tip.

The department operates:

- 1 x 10 cu. yd. Dennis Refuse Side-Loader (with double cab)
- 3 x 20 cu. yd. S & D Pakamatic
- 1 Cesspool Emptyer on a Dennis chassis
- 1 Fordson 3-ton Truck

The Council has one Contract with a farmer for the collection of refuse from 60 isolated cottages. The access roads to these dwellings are so bad that they are only traversible by farm tractors.

### Refuse Disposal

There is only one refuse tip in use in the area, and a system of controlled tipping is in operation.

### Nightsoil Collection and Disposal

The Council collects nightsoil from 268 cottages scattered over the district. The pail closets are emptied during the day and the contents are disposed of through sewer manholes.

# THEORY OF THE EARTH

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its features.

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its features.

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its features.

### Emptying of Cesspools

There are several hundred cesspools and septic tanks in the area, but only a few receive regular attention by householders. The Council undertakes the emptying of these tanks at a charge of £2 for 600 gallons with a further charge of £1 for each additional load. In order to encourage householders to enter into contracts with the Council to provide a yearly service, the work is also undertaken by agreement at 30/- per tank per year. 204 loads were collected from septic tanks during the year.

### Salvaged Materials

The quantity of salvage reclaimed rose from 54 tons to 148 tons per year. Again during the year it was necessary, owing to shortage of labour, to cease for a short time the collection of waste paper. Most of the paper and rags are separated by the workmen, but if householders would keep all their salvage separate, the amount collected would be much greater.

Total revenue from the sales of salvage rose during the year by £787 to £1,315.

### Provision of Dustbins

The Council has not instituted a municipal dustbin scheme. Galvanised dustbins of heavy pattern are purchased by the Council for re-sale to owners and householders in the area.

### RODENT CONTROL

A Rodent Operative is employed in the search for rats and the treatment of infestations found. In order to encourage the notification of rat infestation by owners or occupiers of private dwellings the Council provides a free service. A charge covering the whole of the cost, plus 20% for administration purposes, is made for the work done at business premises.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The document also highlights the need for transparency and accountability in all financial dealings.

### Conclusion

In conclusion, the document outlines the key principles and practices that govern the financial system. It stresses the importance of adhering to these principles to ensure the stability and trustworthiness of the system. The document also provides a clear framework for the implementation of these principles, ensuring that all participants in the system are held to the same standards.

The document is a comprehensive guide to the financial system, providing all the necessary information for understanding and managing the system. It is a valuable resource for anyone involved in the financial system, and it is essential reading for all participants.

### Appendix A

This appendix provides a detailed overview of the financial system, including a description of the various components and their interactions. It also includes a list of the key players in the system and their roles. The appendix is designed to provide a clear and concise summary of the system, making it easy for anyone to understand.

### Appendix B

This appendix provides a detailed overview of the financial system, including a description of the various components and their interactions. It also includes a list of the key players in the system and their roles. The appendix is designed to provide a clear and concise summary of the system, making it easy for anyone to understand.

### CARAVAN SITES

There are two sites licensed under the Caravan Sites and Control of Development Act, 1960, and both are only used as holiday sites. One site provides for 50 caravans and the other site for 28 caravans. One weekend hut was re-licensed under Section 269 of the Public Health Act, 1936. There are also two single licensed caravans in permanent residential use and four single licensed caravans for weekend use.

The caravan sites in the area comply with the standards recommended under the Model Conditions for Site Licenses.

### SANITARY ACCOMMODATION AT SCHOOLS

There are 13 schools in the area and all have a public mains supply of water. All the schools are drained to the public sewers.

### SMOKE ABATEMENT

There are 11 factory chimneys in the area and 2 observations were taken during the year. The few occasions when nuisances are caused arise from peak demands for steam.

The types of firing at the 11 factories are as follows:

Hand firing	NIL
Mechanical Stokers	2
Oil firing	9

### Smoke Control Orders

Works of adaption were completed in 1964 on the Feniscowles No. 1 Smoke Control Order. There are 1,043 houses in the area. A second order was made in 1969 to cover 360 houses at Feniscowles. The order comes into operation on the 1st July 1970. It is intended to follow up with further orders to cover Cherry Tree.

### PETROLEUM REGULATIONS

There are 78 underground tanks in the area which are licensed by the Council for storage of petrol. The Council have accepted the model code of practice for licensing conditions and require the testing of tanks at the expiration of 20, 25, 30, 32, 34 etc, years from installation. Already a number of tanks have been found to be defective and have been filled with water.

# Introduction

The purpose of this study is to investigate the effects of various factors on the growth and development of the human brain. The study is designed to explore the relationship between environmental factors, such as nutrition and stress, and the structural and functional changes in the brain. The research is conducted in a controlled laboratory setting, where the effects of these factors are measured using advanced imaging techniques and behavioral assessments.

## Methodology

The study involves a series of experiments where participants are exposed to different levels of stress and nutritional interventions. The participants are monitored over a period of several months, during which time their brain structure and function are assessed using magnetic resonance imaging (MRI) and other neuroimaging techniques. Behavioral data is also collected to correlate brain changes with cognitive and emotional states.

## Results

The results of the study show that both stress and nutrition have significant effects on brain development. High levels of stress were associated with reduced volume in certain brain regions, particularly in the prefrontal cortex, which is involved in executive functions. Conversely, a diet rich in essential nutrients, such as omega-3 fatty acids and antioxidants, was associated with increased brain volume and improved cognitive performance. These findings suggest that a healthy diet and low stress levels are crucial for optimal brain development.

## Conclusion

In conclusion, the study demonstrates that environmental factors play a critical role in brain development. The findings highlight the importance of maintaining a balanced diet and managing stress to support healthy brain growth. Further research is needed to explore the underlying mechanisms of these effects and to develop interventions that can optimize brain health in different populations.

## INSPECTION AND SUPERVISION OF FOOD

### Milk Sampling

11 samples of milk were taken from retailers in the area for bacteriological examination and all were found to be satisfactory. Reports were received from the Public Health Laboratory that samples of milk obtained by the County Officers from retailers of designated milks and submitted for biological examination were found to contain brucella organisms.

A total of 162 individual cow samples were collected from farms and 20 cows were found to be giving infected milk. Regulation 20 notices were served on two producer-retailers requiring pasteurisation of milk.

### Ice-Cream

There are 32 retailers' premises on the Council's register. In all cases ice-cream is wrapped and only four different makes are retailed.

### Meat Inspection

There are no licensed slaughterhouses in the Rural District.

### Poultry Inspection

There are no premises in the area where large scale killing and dressing of poultry takes place.

### Other Food Preparing Premises

Priority of inspection has always been given to the preparation and handling of meat, ice-cream and milk.

The number of food premises, by type of business, in the district was:

General Grocers and Provision Dealers	45
Greengrocers (including those selling wet fish)	3
Fishmongers	1
Meat Shops	6
Bakers	3
Fried Fish Shops	5
Shops selling mainly sugar confectionery, etc.	4
Licensed premises, Canteens, Cafes, Etc.	36

All premises are fitted to comply with Regulations 16 (wash hand basins) and 19 (sinks) Food Hygiene (General) Regulations 1960.

## HOUSING IMPROVEMENT GRANTS

- (a) Discretionary Grants - Three dwellings were reconditioned and the total amount of grants paid was £1,067.
- (b) Standard Grants - 30 dwellings were provided with standard amenities, i.e. bath, wash basin, hot and cold water supply, internal water closet and a ventilated food store. The total amount of grants paid was £3,771.
